

**Title:- An exclusive solution for playing the Snakes and Ladders game virtually**

**By:- Om Satpute**

**Date:- 15 June 2021- 20 July 2021  
(35 days)**

**A few basic concepts used in this code are:**

- Dictionary**
- List**
- Generating a random number**
- Selecting a random value from a list**
- Adding wait/sleep in program**
- Conditional Statements i.e. IF and ELSE**
- Getting input from the user**

**What is happening in the Game:**

- 1- Display the welcome message**
- 2- Collect the player's names**
- 3- Until one of the players wins do the following:**
  - 3.1- Roll the dice**
  - 3.2- Move the player forward for the value got on the dice roll.**
  - 3.3- If the player is on the snake's head, move down to its tail**
  - 3.4- If the player is on the ladder's bottom, take it to its top**
  - 3.5- else remain there and let the second player roll the dice**
